We, Kimmatic Aluminum Machinery LLC by Korean management, have been supplying aluminum extrusion lines since 2005 with more than 30 years experience in extrusion fields. We opened our joint-ventured factory in China and started manufacturing our own brand extrusion press supported by Korean technology from 2023 and so our price and quality of our press is now most competitive and reliable in the world and its excellent service will be fully guaranteed for life long.

Our factory already in-house manufactured from 500T to 7000T extrusion press with conventional up loading, short stroke back loading and short stroke front loading press etc. Also we can manufacture more than 7000T capacity press whenever customer requires.

In addition to the extrusion press, we are supplying below mentioned machineries and equipments under collaboration with partner factories in China to provide complete full extrusion line at most competitive price under our full warranty.

- Billet(log) heater with shear and hot saw : single and multiple heater.
- Puller: single and double puller
- Handling table with stretcher
- Aging oven and die oven
- Other equipment for the extrusion line like dies, packing machine, thermal break machines etc

Automation Precision Low-Maintenance

## The High-Speed Dimension for Float Glass

Fully automated processes and outstanding acceleration and motion dynamics make our Galactic a high-performance solution for cutting float glass. With its adaptability to customers' specific needs and precise, low-maintenance linear drives, the system knows how to impress with superior performance on simple and complex cutting lines.

- High performance due to low-maintenance linear drives
- Precise scoring results for shapes and straight cuts
- Customer-specific configuration with, for example, laser marking, edge decoating and Upgrind for TPF and EasyPro
